The application has been amended as follows:

- In the abstract, line 1: change "**comprising**" to – **including** --.

The examiner's amendment has been made in order to place the application in a condition for allowance.

### DETAILED ACTION

2. This office action is in response to applicant's amendment filed on October 20, 2005.
3. Claims 1-29 are pending. Claims 9-29 are newly added.

### *Oath/Declaration*

4. The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because: **It does not include a signature of the inventor.**

***Allowable Subject Matter***

6. Claims 1-29 are allowable over the art of record.
7. The following is an examiner's statement of reasons for allowance: There is no suggestion or teaching in the art of record disclosing a ROM circuit including memory cell columns arranged in groups of two adjacent columns wherein each column of a group is selectively activated relative to the other column of the group, and each column in a group is connected by one end to another activation line that selects the other column in the group as recited in the independent claim 1, nor is there suggestion or teaching a memory circuit having a second block select line coupled to a first and a second column of memory cells and providing a second signal being complementary to a first signal which is provided from the first block select line to select the first column, in combination with the remaining claimed limitation as recited in the independent claim 9.
